

Digital B2B payment tools can significantly alleviate issues associated with working professionals abruptly being obliged to work remotely.

The Challenge

- Many business processes, including B2B payments, have historically relied on employees being present in the office.
- Employees for many organizations have asked to or been asked to work remotely.
- How can an organization maintain 'business as usual' with remote employees?

The Solution

- Leveraging the various digital tools offered by B2B payments providers, critical business functions can be handled by employees no matter where they are.

Accounts Payable

- With a digital AP solution, purchase orders, invoices and payments can be managed **from online and mobile devices anywhere in the world.**
- Mobile / online AP tools allow users to:
 - Set approval workflows
 - Generate purchase orders
 - View and approve invoices
 - Make payments
 - Manage disputes
 - Generate and view reports

Accounts Receivable

- Digital AR tools allow organizations to automate billing processes such that invoices and payments can be accepted **from any remote location.**
- Mobile / online AR tools allow users to:
 - Deliver invoices
 - Receive push notifications
 - Receive payments
 - Match invoices and payments
 - View receivables dashboards
 - Automate collection messages

With the right tools in place, business operations can continue seamlessly even with employees being temporarily displaced.
