

# MineralTree TotalAP for Sage Intacct

Sage Tech Partner  
Plus

## AP Automation and Payment Optimization For Intacct Users

MineralTree TotalAP effortlessly automates your entire invoice-to-pay workflow with software and payment services built for Sage Intacct. Adding MineralTree TotalAP to your Intacct environment helps ensure that your back office can meet your digital transformation goals. TotalAP provides streamlined invoice capture, approval and payment workflows, ensuring that Intacct users can save substantial staff time, reduce processing costs, and eliminate overcharges and double payments due to manual error, while also protecting against fraud.

TotalAP is a Sage Recommended Solution built with deep API-level connections to ensure data is always in sync and is tested against the latest Intacct releases. TotalAP supports many of the features critical to Intacct users, including 2-way syncing of invoice header and line items, vendor credits, multi-entity support, and multi-currency support.

### Seamless, 2-Way Sync

TotalAP provides direct, API-level integration with your Intacct ERP, enabling full AP automation & GL functionality between your accounting system and our software. Regardless of your environment, TotalAP provides multiple configuration options for managing integration at the account level, subsidiary level, or a mixed/multi-entity environment.

### Supported Sync Features:

- Multi-currency support for International Payments<sup>1</sup>
- Single account or multi-entity support
- 2-way Invoice Sync
- Flexible approval workflows and exception handling workflows
- Payment Account Integration
- 2-way Payment Authorization & Reconciliation
- Unlimited document storage
- 1099 Designation

<sup>1</sup>Payments must originate from a supported bank account

# Integrating TotalAP with Intacct is Easy

Getting started with TotalAP is easy--our application can be installed directly from your ERP. MineralTree also provides a dedicated Implementation Manager to walk you through the configuration options that make the most sense for your business. You can be up and running in a matter of hours.

## Our Step-by-Step Integration Process

- 1** Meet with your dedicated Implementation Manager to confirm how you would like your TotalAP company configured (multi-entity, user roles and permissions, etc.)
- 2** Add MineralTree to the Web Services authorizations in your Intacct account.
- 3** Click "Connect to Intacct" in the MineralTree application and select your company, and entity if appropriate.

When BrightView Health migrated its ERP to Sage Intacct, adding MineralTree for AP automation was a no-brainer. Thanks to MineralTree's direct API integration, we were able to get up and running quickly while keeping everything in sync with Intacct. Moreover, MineralTree's support for multi-entity environments has allowed our team to better manage our business growth, as we've expanded to nearly 50 locations.

- **Matt Santell, Controller**

## Benefits of MineralTree TotalAP with Intacct

### Increase Efficiency

Eliminate manually entering and coding invoices, cutting checks, and dealing with vendor inquiries. Scale AP without adding headcount.

### Mitigate Fraud & Risk

Eliminate paper checks to reduce risk, apply best-in-class security controls, and ensure complete auditability across your AP process.

### Simplify Reconciliation

Fully automate payments by eliminating paper checks and shifting to virtual card and ACH ePayments with seamless reconciliation and 2-way sync.

### Generate Savings & Cash

Leverage MineralTree's supplier network and white-glove services to maximize cost savings and rebates by converting checks into virtual card and other ePayments.

### Bolster Supplier Relations

Improve the vendor experience with timely payments using preferred methods, enhanced remittance, and professional support from our team.

### Improve Visibility & Control

Centrally manage the entire invoice-to-pay process to ensure consistency and visibility across user roles, business units, and locations.
